

Project name : Extension and densification of the multimodal terminal Strasbourg port

Year : 2023

Location : Strasbourg, FRANCE

Client : Port Authority of Strasbourg

Main project features:

The client is looking the opportunity to change the container river terminal south of the port of Strasbourg in a multimodal platform (river, train, road) and to double the current annual capacity.

Service performed :

- Port operational due diligence
- Traffic forecast analysis
- Operational needs estimation (quay length, rails length, barge gantry cranes, rail RMG, stacking yard areas, gates, OCR, internal port roads, buildings)
- Development of 6 scenarios (master plan level)
- Development of the scenario selected (concept design level)

Activities : Port planning
